Assessment Plan – Department of EECE

MS in Electrical and Computer Engineering

SLO	2017-2018	2018-2019	2019-2020	2021-2022	2022-2023
SLO 1: An ability to					
identify and formulate					
requirements for					
advanced systems					
SLO2: An ability to					
analyze and prioritize					
requirements and					
constraints in order to					
determine the features					
that must be included in					
advanced systems					
SLO3: An ability to					
design advanced digital					
or analog systems that					
meet all requirements					
SLO4: An ability to					
implement designs for					
digital or analog					
systems and evaluate					
how well the designs					
meet the requirements					
SLO 5: An ability to					
conduct literature					
research and assess its					
impact on electrical					
and/or computer					
engineering issues					
SLO 6: An ability to					
apply current					
technologies and use					
modern tools to solve					
engineering problems
