California State University, Chico

Department of
Electrical and Computer Engineering

Graduate Student
Handbook

April 2024
Foreword

The Department of Electrical and Computer Engineering (EECE) at California State University, Chico (CSU Chico) offers a graduate program leading to the Master of Science in Electrical and Computer Engineering (MSECE), with focus on Electrical/Electronics or Computer Engineering in the following technical areas: (1) Signal, Systems, and Machine Learning; (2) Photonics; and (3) Embedded Systems.

The EECE Faculty members are involved in diverse research areas, offering graduate students opportunities to conduct research in some of the most cutting-edge and impactful fields, including artificial intelligence and machine learning, information/cybersecurity, optical imaging, bioinstrumentation, digital signal and image processing, digital control systems, high-speed analog and digital electronics, photonics, optoelectronics, VLSI design, microprocessor systems, digital system design and simulation, computer architecture, computer networks, and optical and wireless communications.

This handbook describes the MS program in the Department, outlines a number of procedures for graduate students and states various departmental regulations.

Information provided in this handbook is intended as a supplement to, and not a substitute for, the Guide to Graduate Studies of CSU Chico. The Guide to Graduate Studies contains general rules and regulations governing the University’s graduate programs.

INTRODUCTION

Welcome to your door to the future! If you are already a graduate student, beginning your program of study, or a prospective graduate student, this handbook is a valuable resource for you. It is intended to provide a single source for most of the administrative policies and details that you’ll need to know during the course of your Master’s study in the Department of Electrical and Computer Engineering (EECE) at CSU Chico. You also need to know what resources exist (other than this document) to help you through the process. Here’s a summary:

Graduate Coordinator: The Graduate Coordinator is your primary contact for administrative and advising issues. The Graduate Coordinator is Dr. Hassan S. Salehi

Office: OCNL 316  
Phone: 530-898-5816  
Email: hsalehi@csuchico.edu

Guide to Graduate Studies: This is a very helpful document, provided by the Office of Graduate Studies, that describes the general university policies relating to graduate programs at CSU Chico. It also contains outlines and formatting instructions for Thesis/Project documents. It is available from the Office of Graduate Studies at: A GUIDE TO GRADUATE STUDIES

Department Office: At the Department office, you can obtain department-level forms and receive answers to most of your general questions.

Department Office: OCNL 313  
Phone: 530-898-5343  
Department Website: http://www.csuchico.edu/eece/

Student file: In the department office, a file is maintained for every active graduate student, that contains all of the relevant paperwork documenting that student’s career at CSU Chico, from admission to graduation. The Graduate Coordinator can retrieve your file for you, and review it with you, to ensure that it is complete and accurate.

Admission letter: The admission letter that was sent to you announcing your acceptance into the master’s program, may contain significant information about things like prerequisite courses you may be required to complete, fee waivers you may have been awarded, etc. If you need a copy of the letter that was sent to you, see the Graduate Coordinator.

If you have questions or problems, these resources can help you resolve them. Use them to ensure that you are on track and satisfying all of the degree program requirements.
1. ADMISSIONS

The graduate program in the EECE Department is open to all qualified individuals with accredited B.S. degrees in Electrical Engineering, Computer Engineering or an equivalent approved by Graduate Studies. Applicants must have a grade point average of at least 2.5 on a 4.0 scale in previous undergraduate work.

Applicants with a bachelor’s or master’s degree in another field may also be eligible to pursue graduate study in the EECE Department after completing all required remedial preparation at the undergraduate level. The set of remedial courses required will be based on each applicant’s previous academic work, and will be specified by the Graduate Coordinator.

International students who have completed a Bachelor’s Degree program that does not include the necessary background course material may also be required to complete some remedial course work after admission to the program. This list of remedial courses will be identified in each applicant’s admission letter.

An applicant for admission must complete the following steps:

- Submit a completed Application for Admission to the Office of Graduate Studies of CSU Chico through the website: https://www.calstate.edu/apply.
- Pay the university application fee.
- Submit official transcripts of all previous college level work.
- Submit one letter of recommendation assessing the applicant’s academic potential.
- Submit a Statement of Purpose.

International applicants are also required to:

- Submit Test of English as a Foreign Language (TOEFL) scores or International English Language Testing System (IELTS) scores.

The above documents must be sent directly to the Office of Graduate Studies, CSU Chico.

1.1 PART-TIME GRADUATE STUDIES

Admission to the program and requirements for the M.S. degree on a part time basis are identical to that for admission to the regular full-time program.

2. ADMISSION STATUS

Provisional admission may be granted to applicants who lack undergraduate or graduate work considered essential for graduate study in the EECE Department. Additional course work, without graduate credit, will be required to make up such deficiencies before promotion to classified status can be granted. Remedial course work required will be determined by the Graduate Program Coordinator and approved by the Department Chair.
Each graduate student receives an acceptance letter which states the level at which the department recommends admission and stipulates any specific conditions of the admission. A graduate student’s status falls into one of four categories:

- **Unclassified.** An unclassified student is not admitted to a master’s degree program but is enrolled for a variety of objectives. These may include completing remedial course work to qualify for a master’s degree program, earning a second baccalaureate or second major, or taking class work for professional development.

- **Conditionally classified.** A conditionally classified student has been admitted to the desired master’s degree program, but has not been formally approved for master’s degree study and is taking steps to meet specific requirements outlined by the university and the department to qualify for “classified” status.

- **Classified.** A classified master’s degree student has been formally approved by the department and the Office of Graduate Studies to pursue master’s degree study.

- **Candidate.** A student is advanced to candidate status (candidacy) only after demonstrating a significant ability and aptitude for the discipline.

### Prerequisites for Admission to Conditionally Classified Status:

- Satisfactory grade point average as specified in [Graduate and Postbaccalaureate Admission Requirements](#) in the *University Catalog*.
- Approval by the department and the Office of Graduate Studies.
- A professionally accredited baccalaureate in electrical or computer engineering, or an equivalent approved by the Office of Graduate Studies.

### Prerequisites for Admission to Classified Status: In addition to any requirements listed above:

- Students must have completed background preparation courses equivalent to **EECE 315, EECE 344, EECE 365**, and **MATH 260**.

All required undergraduate Electrical and Computer Engineering (EECE) courses must be taken for a letter grade, and a grade of C or higher must be earned in each course. Students are required to complete the background courses, if needed, immediately as a matter of reasonable progress toward the master's degree.

### Advancement to Candidacy: In addition to any requirements listed above:

- Formation of the graduate advisory committee in consultation with the Graduate Coordinator for students pursuing Thesis/Project option.
- Development of an approved program, including a thesis or project proposal if the thesis or project plan is chosen, in consultation with the Graduate Coordinator.
• Classified graduate standing and completion at the University of at least 9 units of the proposed program with a minimum 3.00 grade point average.

3. FINANCIAL ASSISTANCE

Full-time graduate students in the EECE Department may apply for the following forms of financial assistance.

• Teaching Assistantship (TA)
• Research Assistantship (RA)
• Financial Aid
• Tuition Waiver (TW)

For all the above types of financial assistance, additional tuition and fees as required by the university are the responsibility of the student.

3.1 TEACHING ASSISTANTSHIP (TA)

Teaching assistantships may be available to a selected number of qualified full-time graduate students of the EECE Department, upon completion of at least one semester of study in the program. Graduate students with a GPA over 3.0/4.0 may be considered for a teaching assistantship. The teaching assistants are required to devote up to 20 hours per week of effort in teaching, research, or appropriate service. These assistantships are usually for one semester period, and most commonly involve grading or lab course work in support of lower division undergraduate courses. Appointments are made by recommendations of the Graduate Coordinator and approval of the Department Chair on the basis of department needs. TA positions are awarded for a fixed, stated period of time and continuation of the position beyond that time is not implied.

3.2 RESEARCH ASSISTANTSHIP (RA)

Research assistantships may be available as a result of grants and contracts of the faculty doing sponsored research. Graduate students with a GPA over 3.0/4.0 may be considered for a research assistantship. These assistantships are normally made available for a 9-month period with the possibility of additional compensation during the summer. RA awards are made directly by the faculty in charge of the sponsored research. The research assistant is required to devote up to 20 hours per week on an assigned research project. Continuation or termination of the appointment is decided by the faculty advisor (principal investigator) on the basis of the availability of funds and the student’s progress in research and academic standing.

3.3 FINANCIAL AID

Financial Aid is applied for and awarded by the Financial Aid and Scholarship Office, and is independent of the EECE department assistance. Information about their programs can be found at http://www.csuchico.edu/fa/
3.4 TUITION WAIVER (TW)

A TW provides full-time or partial tuition waiver for the recipient. TW awards are available to qualified full-time graduate students on a competitive basis. A TW recipient may be required to perform departmental services as assigned by the EECE Department Chair. TWs are only offered to students based on academic excellence.

4. ADVISING

All graduate students are required to meet with their faculty advisor prior to the beginning of each semester.

4.1 INITIAL ADVISING

The Graduate Program Coordinator will serve as temporary faculty advisor for all students until an advisor is selected.

4.2 FACULTY ADVISOR

During the first semester, all full-time students should meet with EECE faculty members to discuss potential focus area for their MS program. Such meetings give both the faculty member and the student an opportunity to evaluate their respective abilities to collaborate and work with one another.

By the end of the tenth week of the first semester of enrollment, all new full-time graduate students should submit the name(s) of EECE faculty whom they would like to have as their permanent advisor. The Graduate Program Coordinator will help to match students and faculty advisors based upon first choices wherever feasible. Students should meet with the faculty advisor assigned to initiate planning of the research topic as soon as possible after receipt of notification. The faculty member becomes the student’s permanent faculty advisor.

Primary responsibilities of the faculty advisor are as follows:

- Approve the student’s plan of study. Such a program of study must also be approved by the Graduate Program Coordinator.
- Monitor the student’s progress.
- Approve any revision(s) to the plan of study.
- Assist and guide the student in his/her program.
- Transmit results to the Graduate Program Coordinator using appropriate forms.
- Oversee the student’s research method (Culminating Activity option), as appropriate in due time.
• Oversee the student’s thesis, or project defense (Thesis/Project option).

A student may change faculty advisors by completing the appropriate forms through the department office.

4.3 RESPONSIBILITIES OF GRADUATE STUDENT

• Maintain 3.0 GPA, and no more than two courses with C grade.

• Comply with University, College, and Department regulations.

• Complete and submit appropriate forms.

• Keep the EECE department office updated regarding current address, email address and phone number.

5. REGISTRATION

The registration procedure begins in the EECE Department. The Graduate Program Coordinator will serve as the student’s temporary faculty advisor until a permanent advisor is chosen. A Plan of Study should be prepared and submitted as soon as possible after selection of the permanent advisor.

Changes in the student’s program of study may be requested by submitting a Plan of Study Course Substitution Form. It is the responsibility of the student to insure that required courses in the program are taken.

5.1 FULL-TIME STATUS

Full-time graduate students supported by the Department must register for a minimum of 8 graduate units each semester including projects, independent study, research and thesis. Courses taken on an audit basis are excluded from this number.

5.2 PART-TIME STATUS

To maintain an active degree program status, a student must be continuously enrolled at CSU Chico. This can be done by registering for at least one credit each term, or by maintaining adjunct enrollment status through the Center for Regional and Continuing Education. Adjunct enrollment maintains a student’s active status when no current course work is being done, for a nominal administrative fee. However, it is expected that every part-time student will take at least one course per term or register for thesis/project work so as to complete the degree program within a reasonable time. Exceptions may be granted for such reasons as illness, maternity leave, travel requirements imposed by employers, or others.

5.3 RESEARCH COURSES

• EECE 699T – Thesis

When pursuing the graduation with Thesis option (Plan A), a student must enroll in this course during their final year of study. This course is counted as 6 semester units towards
satisfying the overall 30 unit graduation requirement. Typically, this course is taken as two 3-unit enrollments over two semesters.

- **EECE 699P – Project**
  When pursuing the graduation with Project option (Plan B), a student must enroll in this course during their final year of study. This course is counted as 3 semester units towards satisfying the overall 30 unit graduation requirement.

- **EECE 693 – Research Methods in Electrical and Computer Engineering**
  When pursuing the graduation with Culminating Activity option (Plan C), a student must enroll in this course during their final year of study. This course is counted as 3 semester units towards satisfying the overall 30 unit graduation requirement.
  This course is designed to provide graduate students in the field of Electrical and Computer Engineering with a comprehensive understanding of research methods, simulation and/or experimentation, technical writing, and communication skills. Through immersive learning experiences, students will gain practical knowledge in conducting research, interpreting results, technical writing, and oral presentation of scientific ideas. The course will culminate in a comprehensive research project with a final defense.

- **EECE 697 – Independent Study**
  Independent study is defined as individualized study under the direction of an EECE faculty member, and is distinct from thesis research. A maximum of 9 credits of independent study may be counted toward the M.S. degree course work requirements (includes Thesis/Project/Culminating Activity units). This course number is not to be used for thesis.

6. **GENERAL INFORMATION**

Students are expected to make continuous progress toward their degrees.

**6.1 COMPLETION OF STUDENT RESEARCH**

The student and the advisor must agree on a time table to complete the degree.

**6.2 GRADE REQUIREMENTS FOR GRADUATION**

In order to be awarded the Masters Degree, the student must have a grade point average (GPA) of at least 3.00/4.00 (B average) for all credits (course work and thesis research) in his or her program of study. Grades earned in courses which are repeated are included in the computation of the GPA except for up to one repeat with forgiveness. In addition no more than two courses with C grade are allowed.

If a grade of incomplete (I) or report in progress (RP) is received, the student must remove the I or the RP grade from the record as soon as possible. After one academic year, the I grade automatically changes to an F (failure). No student may graduate with an I or RP grades on the record.
6.3 CONTINUATION

A student may continue in the EECE Department as long as reasonable progress is being made toward the degree. From an academic viewpoint, this means that the student’s record in graduate course work, exclusive of thesis research, continues to exhibit an average of B or better and that I and RP grades are promptly removed for the student record.

6.4 PROBATION and DISMISSAL

If a student’s grade point after the first semester of coursework is below 3.0, she/he will receive a letter from the Graduate Office that she/he has been placed on probation. The student is given one semester to raise his/her GPA above 3.0. If the student does get her/his GPA above 3.0, she/he is taken off probation. If the student does not raise her/his GPA above 3.0 and does not receive a semester GPA above 3.0, he/she will be dismissed from the program.

6.5 FACILITIES

The department has an excellent set of laboratory facilities, and after hours access is granted to graduate students pursuing research activities (Thesis, Project, or Independent Study) on a case by case basis. Approval by the Graduate Coordinator and Department Chair is required.

7. MASTER OF SCIENCE DEGREE REQUIREMENTS

7.1 BASIC REQUIREMENTS

Completion of all requirements as established by the department graduate committee, the graduate advisory committee, and the Office of Graduate Studies, to include:

1. Completion of an approved program consisting of 30 units of 400/500/600-level courses as follows:
   a. Completion of at least 18 units of approved 600 level elective courses.
   b. Completion of the remaining units with 400, 500, or 600-level courses.
   c. At least 18 units, including a thesis, project, or culminating activity, must be in Electrical and Computer Engineering (EECE) courses; remaining units may be selected from electrical or computer engineering or in related areas with the approval of the Graduate Coordinator.
   d. At least 18 of the units required for the degree must be 600-level Electrical and Computer Engineering (EECE) courses.

2. Completion and final approval of one of the following three plans as specified by the graduate advisory committee:
   a. Thesis Plan (Plan A). This plan includes 24 units of coursework and 6 units of thesis research (EECE 699T). Research may be theoretical or applied, but must reflect an individual in-depth study into an approved topic. This plan requires a formal research thesis which must be submitted to the Office of Graduate Studies for approval and accession to the library.
b. Project Plan (Plan B). Requirements for this plan consist of 27 units of coursework and 3 units of project preparation (EECE 699P). The project must show how analysis and design have been applied to a particular area of electronic or computer engineering. A written project description must be submitted to the Office of Graduate Studies for approval and accession to the library.

c. Culminating Activity (Plan C). Requirements for this plan consist of 27 units of coursework and 3 units of EECE 693.

3. Approval by the Graduate Coordinator and the Graduate Council on behalf of the faculty of the University.

**Graduate Requirement in Writing Proficiency:**

All students must demonstrate competency in writing skills as a requirement for graduation. Electrical Engineering students will demonstrate their writing competence through successfully completing EECE 699T Master’s Thesis, EECE 699P Master’s Project, or EECE 693 Research Methods in Electrical and Computer Engineering.

**Graduate Grading Requirements:**

All courses in the major (with the exceptions of Master’s Project - 699P and Master’s Thesis - 699T) must be taken for a letter grade, except those courses specified by the department as ABC/No Credit (400/500-level courses), AB/No Credit (600-level courses), or Credit/No Credit grading only. A maximum of 10 units combined of ABC/No Credit, AB/No Credit, and Credit/No Credit grades may be used on the approved program (including 699P, 699T and courses outside the major). While grading standards are determined by individual programs and instructors, it is also the policy of the University that unsatisfactory grades may be given when work fails to reflect achievement of the high standards, including high writing standards, expected of students pursuing graduate study.

Students must maintain a minimum 3.0 grade point average GPA in each of the following two categories: all graduate coursework taken at any accredited institution subsequent to admission to the master’s program, and all courses on the approved master’s degree program.

In addition, students may not count more than two courses in which they received a grade of C toward the approved program.

A student may repeat one class with forgiveness if he/she receives a grade lower than a B in the
class. The student must fill out a Repeat-With-Forgiveness form at the Graduate Office to choose this option. After completion of the repeated course, the grade for the first course will be removed from the transcript but the transcript will still show that the course was taken.

With all options above, the students must complete the following additional requirements:

- An approved Plan of Study.
- Courses taken on an audit basis do not count toward the degree.
- Courses outside the EECE Department must be approved by the Graduate Coordinator prior to registration.

7.2 PLAN OF STUDY

The student must, in conjunction with his/her faculty advisor, prepare a coherent Plan of Study related to courses in at least one of the departmental focus areas: (1) Signal, Systems, and Machine Learning; (2) Photonics; and (3) Embedded Systems. The Plan of Study must be approved by the faculty advisor and the EECE Graduate Program Coordinator. Courses will be selected by the student in consultation with the faculty advisor. Any changes in the student’s Plan of Study must be approved in writing by the faculty advisor, the EECE Graduate Program Coordinator, and the Office of Graduate Studies. (Plan of Study form can be found at the back of this document)

7.3 TIME LIMIT

The M.S. degree may be pursued on a full or part-time basis. However, each student must complete all requirements for the M.S. degree within 5 years from the date of the end of the semester of enrollment in the oldest course applied toward the degree, unless a petition for extension has been approved by the faculty advisor, EECE Graduate Coordinator, and the Office of Graduate Studies.

7.4 FORMATION OF THESIS/PROJECT COMMITTEE

Once a student has chosen to pursue the thesis or project option, a thesis or project committee is formed and approved by the EECE Graduate Program Coordinator in consultation with the thesis/project advisor and the student. The M.S. thesis/project committee shall be composed of a minimum of two members of EECE faculty. The thesis/project chairperson and/or advisor must be a full-time tenured or tenure-track member of EECE Faculty.

7.5 THESIS/PROJECT PROPOSAL

The student must prepare a thesis or project proposal prior to the formation of his or her thesis/project committee, which is then reviewed and eventually approved by the committee members. It is the responsibility of the student to circulate or give copies of the proposal to the committee members. Then, using a form available from the EECE Graduate Coordinator, the thesis/project advisor notifies the Graduate Coordinator of the final approval of the thesis/project proposal. This must be done before registering for EECE 699T/699P.
7.6 THESIS/PROJECT SUBMISSION, DEFENSE, AND ACCEPTANCE

A final draft of the M.S. thesis or project report is prepared by the student when the research/work is completed to the satisfaction of the faculty advisor. The student should obtain directions regarding thesis preparation from the Guide to Graduate Studies, available from the Office of Graduate Studies, and should follow the department acceptable format. It is highly recommended that students use a professional typist for the final document preparation (see the Graduate Coordinator for recommendations). The draft thesis should be submitted to the advisor for critical review and evaluation. This should be done in a timely manner, giving the advisor sufficient time to review the final draft. After the thesis advisor has reviewed the thesis draft, recommended changes, and approved the final text and form of the document, the student should submit copies to the thesis committee for evaluation. The thesis committee members should have at least one week for review of the document before the defense. All members of the thesis committee are expected to be present at the thesis defense.

The student, in consultation with the thesis advisor and committee, schedules the thesis defense. The thesis advisor will counsel the student regarding specific topics to be addressed at the defense. The defense is presented in an open, announced meeting presided over by the thesis advisor. The student is allowed 35 minutes (with some flexibility) for a formal oral presentation. Following the oral presentation, the thesis committee, other faculty, students, and guests are allowed to ask questions concerning the student’s thesis work. After the question and discussion period is concluded, all those present, other than the faculty members constituting the committee, will be excused.

The thesis committee holds a private discussion of the student’s thesis and makes a final decision by a majority vote whether the student’s defense has been successful. If the student does not pass the thesis defense, then the thesis committee, in consultation with the Graduate Program Coordinator, will decide a course of action to correct deficiencies, weaknesses, or other problems.

Even if the student passes the thesis defense, there are usually changes or additions/deletions required as a result of the defense. These are made by the student in consultation with the faculty advisor and any concerned committee members. The student should also be aware that the Office of Graduate Studies requires final corrected copies to be submitted by a specified date (usually the 12th or 13th week of the semester), if a student is to graduate that semester.

At least two permanently bound copies of the thesis must be prepared in accordance with the University regulations, if there are any. One copy is to be provided to the faculty advisor and the other will be retained in the files of the EECE Department. Additional copies (as specified in the Guide to Graduate Studies) are submitted to the Office of Graduate Studies for archival storage in the University library. It is the student’s responsibility to pay costs associated with copying and binding of the thesis.

Similar procedures shall be followed for the Master’s project option.

7.7 THE CULMINATING ACTIVITY

Students opting for the Culminating Activity (CA), have to successfully complete a comprehensive research project with a final defense in order to complete their degree requirements. The CA is offered as EECE 693 Research Methods in Electrical and Computer Engineering.
CA Objective:
It is designed to provide graduate students in the field of Electrical and Computer Engineering with a comprehensive understanding of research methods, simulation and/or experimentation, technical writing, and communication skills.

CA Format:
- Research Proposal 10%
- Progress Reports 40%
- Oral Presentations 10%
- Final Report and Defense 40%

7.8 GRADUATION
Students must apply for graduation on the Application for Degree form which is filed with the Office of Graduate Studies before a specified date in the semester during which degree requirements are expected to be completed. This date usually falls during the 3rd or 4th week of the semester. Specific dates for the current academic year can be found at:

Graduate Coordinator: ____________________________
Graduate Program 2-Year Plan Timeline

1st Semester:

- Attend Orientation Meeting
- Get to Know Faculty
- Use Graduate Program Coordinator for Advice
- Choose Faculty Advisor by week 10
- Complete and File the Master’s Degree Plan of Study (week 11)

2nd Semester:

- Apply for TA/RA Positions (prior to start of semester)
- Begin Thesis/Project Background Research, if choosing one of these options
- Submit Thesis Proposal, if choosing this option (Plan A)
- Form Thesis Committee, if choosing this option (Plan A)

3rd Semester:

- Submit Project Proposal, if choosing this option (Plan B)
- Form Project Committee, if choosing this option (Plan B)
- Start Actively Working on Thesis/Project, depending on the option selected

4th Semester:

- File for Graduation
- Complete Thesis/Project Work
- Complete the Culminating Activity, if choosing this path (Plan C)
- Submit Project/Thesis to Graduate Office
