

About Chemicals

UC Chemicals is a cloud-based chemical inventory management tool developed with a researcher-centric approach. It allows easy tracking and maintenance of containers using a barcoding system. Chemical and safety information, such as hazard codes and first aid, are auto populated. The application enables users to create chemical networks to easily share chemicals while controlling access. UC Chemicals includes a complementary web application that works in sync with the mobile app and has additional features such as structure search and import/export capabilities.

Installing the UC Chemicals Application

For iOS users

1. Navigate to the App Store
2. Search for UC Chemicals
3. Select **Install**
4. Launch the application
5. Select your campus
6. Log in with your campus credentials

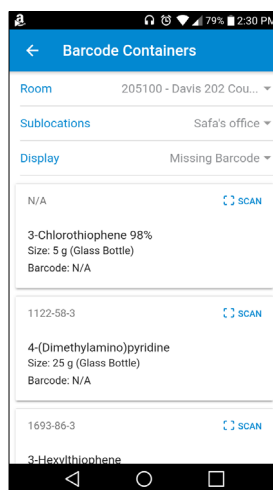

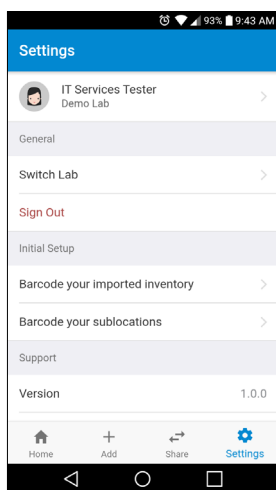

For Android users

1. Navigate to the Google Play Store
2. Search for UC Chemicals
3. Select **Install**
4. Launch the application
5. Select your campus
6. Log in with your campus credentials

Barcode and Scan an Imported Inventory (Mobile)

Once your lab's inventory has been imported:

1. Launch the app on your mobile device.
2. Select the **Settings** icon .
3. Select **Barcode your imported inventory**.
4. Filter for a specific room and sublocation (helpful for labs with multiple rooms and sublocations).
5. Select the **Display** filter and select **Missing Barcode** from the Display filter drop down menu. This will display a list of containers missing a barcode label.
6. Add a barcode label to the chemical container.
7. Scan the barcode with your device by tapping the **Scan** button for the container in question.
8. The barcode is automatically saved and the container will be removed from the **Missing Barcode** filtered list.
