**Legend:**

YS: Yvette Streeter, Emergency Preparedness Manager, Department of Environmental Health and Safety
The purpose of the Emergency Action Plan is to serve as a supplement to California State University, Chico’s Injury and Illness Prevention Program (IIPP) and must be used in conjunction with the IIPP.

The Emergency Action Plan establishes procedures and provides information which is necessary to ensure that members of the University community are knowledgeable in the appropriate actions to take in the event of an emergency. These procedures have been provided to ensure the safety of each individual and the safety of the campus community.

Reference: California Code of Regulations, Title 8, Section 3220.
2.0 INTRODUCTION

The purpose of the California State University, Chico Emergency Response Guide is to provide guidance to the campus community on how to appropriately respond to a variety of emergencies that may occur on campus.

Once you are familiar with this information, you will be able to better protect yourself and others. You are encouraged to read this guide in its entirety to gain the knowledge to be able to act quickly in an emergency situation and to minimize your exposure to danger. However, nothing in this plan shall be construed in a manner that limits the use of good judgment and common sense in matters not foreseen or covered by the elements of the plan. If you have questions regarding your safety, please contact your Supervisor or Manager immediately, or contact the Department of Environmental Health and Safety at (530) 898-5126 during campus business hours.

Emergencies, disasters, accidents, and injuries can occur at any time without warning. Being prepared physically and mentally to respond appropriately to emergency situations is an individual, as well as, an organizational responsibility. California State University, Chico, has established emergency procedures for you to follow so that the effects of these emergencies can be minimized. The safety of the campus faculty, staff, students, and visitors is a priority.

The appendix of this plan contains a Department Emergency Plan (DEP), which can be used in conjunction with this document to create an emergency response plan for your department or specific area. This plan must be approved by the Supervisor or Manager of the area. This information can be very important and should be site specific to your working environment. We recommend that you use this plan as a tool to be prepared in the event of an emergency in your area. If implemented, the Department Emergency Plan should be reviewed and updated annually or as needed due to staffing or other operational changes. All employees in the area should receive a copy of the DEP and be familiar with its contents. A copy of your Department Emergency Plan should also be sent to the Department of Environmental Health and Safety.
Emergency Action Plan

3.0 EMPLOYEE INJURY

3.1 Life Threatening Injuries

- Dial 911 from any building phone
- If using a cell phone dial 898-5555 to reach University Police
- Use any of the campus blue light phones

Use the following list of examples and your own experience to determine if a life threatening emergency exists and when to call for help:

- Sudden or persistent chest pain, which may or may not be accompanied by nausea and/or vomiting
- Difficulty breathing
- Uncontrollable bleeding
- Severe altered level of consciousness
- Injuries involving trauma (falls, head injuries, severe burns, etc.).

For all types of injuries:

- Keep person calm and comfortable as possible
- Do not move the person unless absolutely necessary
- Never give liquids to an unconscious person
- Do not remove objects that are embedded in a person’s skin.

For life-threatening injuries/illnesses:

- Enloe Medical Center Emergency Room
  1531 Esplanade Ave
  Chico, CA  95926
  Phone: (530) 332-7300
  (Located at the intersection of West 5th Avenue & Esplanade Ave)

Non-Life Threatening Injuries/First Aid

Types of these injuries may include:

- Twisted ankle, wrist and/or back pain (e.g. musculoskeletal disorders);
- Minor cuts or abrasions that might require medical attention;
- Debris, dust and chemicals in eye (use eyewash first if available).

Employees should be escorted to:

- Immediate Care Medical Center, Inc.
  376 Vallombrosa Avenue, Chico, California
  Phone:  (530) 891-1676
  Hours:    Daily 7:00 a.m. to 9:00 p.m.

As needed, call Immediate Care in advance of your arrival to ensure that personnel are able to assist with the injury.
3.2 Serious Injuries/Illnesses

For serious injuries/illnesses or an injury that has occurred outside the regular business hours of the Immediate Care Medical Center, please go to:

- Enloe Medical Hospital – Emergency Care
  1531 Esplanade Avenue
  Chico, California  95926
  Phone: (530) 332-7330
  Open 24 hours/7 days week

3.3 Reporting Responsibilities for Workplace Injuries/Illnesses

3.3.1 Employees: It is the employees’ responsibility to report work related illnesses and injuries to your supervisor immediately. Any delay in reporting an injury may cause delay in workers’ compensation benefits.

3.3.2 Supervisors: It is the supervisors’ responsibility to report the injury/illness immediately to the Human Resources Service Center (530) 898-6771. This office is located in Kendall Hall, Room 220. Within 8-hours of the injury/illness, the direct supervisor must complete all sections of the OSHA 301 form. The form is available in PDF version on the Human Resources web site.

Forward the originals of these forms to the Employee Leaves and Workers Compensation Unit as soon as possible (8-hour maximum).

3.4 Blood or Bodily Fluids

If assisting an injured person before help arrives, wear disposable or other protective gloves if possible. Always thoroughly wash your hands with soap and water for at least thirty seconds after exposure to blood or other bodily fluids. Do not provide first aid or medical treatment that exceeds your level of training.

If a clean-up of blood or other bodily fluids is needed, contact Facilities Management and Services (FMS) during business hours at 898-6222 or contact University Police (UPD) at 898-5555 if after business hours to ensure proper procedures are followed.

For detailed information you can read the Exposure Control Plan (Bloodborne Pathogen Manual) on the Environmental Health and Safety web site: Injury Illness Prevention Program (IIPP) and Supplemental Materials. The written version of the IIPP and the Bloodborne Pathogen Manual is located at the Department of Environmental Health and Safety office.
4.0 FIRE EMERGENCIES

If there is smoke, fire, or an explosion in a building; follow these guidelines:

- If possible, remove anyone from immediate danger.
- Pull the nearest fire alarm station and/or call 911.
- Proceed to the nearest safe exit in an orderly fashion.
- Close all doors including interior offices (do not lock the doors).
- If smoke is present, stay below the smoke. If smoke is heavy, get down and crawl until in a clear area or inside the stairwell.
- Once outside, proceed to the designated Emergency Assembly Point or an area at least 100 feet from the building. The campus Emergency Assembly Point Map can be found at the end of this document.
- Emergency Assembly Points may be adjusted depending on wind direction or the magnitude of the hazard.
- Remain at the Emergency Assembly Point, if possible.
- Attempt to account for all persons known to be in your area.
- Do not return into the building until the Fire Department or designated representative has given the “all clear” to re-enter the building.

If you are trapped in a building or room:

- If possible, go into the nearest enclosed stairwell to shelter in place. Ensure the doors to the building corridor is closed.
- Call 911 from any campus phone or 898-5555 from a cell phone and provide your location.
- Move towards the window and if needed, stay as close to the floor as possible.
- If possible, hang or wave clothing or other item at the window to get attention.
- Do not break windows unless instructed to do so, or if your life is in immediate danger.

If your clothing catches on fire: STOP, DROP and ROLL.

Note: University employees are not required or obligated to use a fire extinguisher.

However, if you have received “hands-on” fire extinguisher training and are comfortable in extinguishing an incipient stage fire, you may attempt to extinguish the fire with a fire extinguisher if ALL of the following conditions are met:

- The fire alarm system has been activated / 911 called and building occupants are evacuating.
- The fire is small and has not spread from its originating point.
- You have the correct type of extinguisher compatible with the fire.
- Your exit is clear and you can extinguish the fire with your back to the exit door.

IMPORTANT!

PLEASE REPORT ALL FIRES, INCLUDING EXTINGUISHED, TO UNIVERSITY POLICE
5.0 BOMB THREAT

If you see a suspicious object or a potential bomb on or near the campus, DO NOT HANDLE THE OBJECT. Clear the area immediately, warn others and call the University Police Department by dialing 911 from any building phone or 898-5555 (x5555).

Any person receiving a phone call indicating a bomb or other explosive device has been placed on or near the campus should attempt to keep the caller on the line as long as possible and ask the questions listed below:

- When is the bomb going to explode?
- Where is the bomb right now?
- What kind of bomb is it?
- What does it look like?
- How can it be deactivated?

If possible, please try to provide the following additional information:

- The exact time of the call.
- Distinguishing factors of the caller: type of voice (loud/soft), accents, gender, jargon, etc.

Note: If the bomb threat is received through the mail, do not further handle the envelope, letter, or package. Clear the area and call University Police (911) from any campus phone or 898-5555 if using a cell phone.

University Police and campus Officials will make the decision to evacuate the building and/or the area. The decision to evacuate will be based on the reported location of the bomb and the time of detonation, if known. The University Police Department and emergency personnel will conduct a detailed bomb search.
6.0 EARTHQUAKE

6.1 During an Earthquake

- Remain calm.
- If indoors, immediately seek refuge under a desk or table or other stable item. Face away from windows and other glass objects.
- DROP, COVER, AND HOLD ON! Cover the back of your neck and head; hold onto the desk or table, or other object so you can remain under protective cover if it moves.
- If outside, get to the nearest open space, away from buildings, overhangs, utility poles, and power lines.

6.2 After the Earthquake Stops

- Evaluate the situation. Check for personal injuries. Protect yourself at all times and be prepared for aftershocks.
- Notify UPD (911) of any injuries or immediate health hazards.
- Evacuate the building if necessary (using the safest and closest exit routes).
- Proceed to the building’s designated Emergency Assembly Point* if safe to do so.
- Be aware of broken glass and other items on the floor that can cause you to trip or fall. Move slowly and carefully.
- Do not leave the campus until you are sure that the surrounding areas are safe (streets, highways, bridges.)
- If the building has been evacuated, do not return into the building until directed to do so by UPD or other emergency personnel (Fire Department) or designated representatives.

For more information on earthquake preparedness go to: http://www.totallyunprepared.com/

* The Campus Emergency Assembly Point map can be found at the end of this document.
HAZARDOUS MATERIALS EMERGENCY PROCEDURES

FIRES: In the event of a fire, leave the area immediately and call 911. Pull a fire alarm on your way out of the area. Fire extinguisher use is not required or expected by any employee. However, if a fire extinguisher is available and if you have been trained on how to use one, they can be used on a small fire in its incipient stage.

CHEMICAL SPLASHES: If chemicals get splashed into your eyes or on your body, immediately rinse and/or flush the affected area with water using the emergency eyewash or emergency shower as applicable. Continue to flush the affected area for 15 minutes while someone else calls 911 and retrieves the Safety Data Sheet (SDS) for the material involved.

INGESTION OF CHEMICALS: If chemicals are accidentally ingested, call 911 immediately and stay in communication with the operator. Be able to identify the materials which were ingested. Retrieve the Safety Data Sheet (SDS) for the material involved.

CHEMICAL SPILLS AND RELEASES

LARGE SPILLS AND / OR HIGH HAZARD SPILLS: For large spills or spills of highly hazardous materials, leave the area immediately and call 911. Pull a fire alarm on your way out if evacuation of the building is necessary to prevent injury to others.*

NOTE: The EHS department is not a hazmat spill cleanup team, but does have a contract in place with a vendor who will respond to hazmat spills on campus. The EHS department will coordinate with this contractor as necessary.

SMALL SPILLS AND/OR LOW HAZARD SPILLS: Only attempt to clean up spills for which you have the appropriate equipment, training, and level of comfort. For advice and/or help with non-emergency spills, call Environmental Health and Safety (EHS) at 898-5126. Hazardous wastes resulting from spills or spill cleanup activities need to be packaged in sealed containers and labeled promptly with hazardous waste labels.

COMPRESSED GAS CYLINDERS: Cylinders pose a hazard if there is a sudden release of pressure. Following such a release, some cylinders can become cold enough to freeze skin. More importantly, depending on their contents, fire or toxic inhalation hazards can exist. Leave the area immediately and call 911. Pull a fire alarm on your way out if evacuation of the building is necessary to prevent injury to others.*

PHONE NUMBERS

Emergencies ------------------------------- 911
University Police ------------------------- 898-5555
Poison Control Center ..................... 1(800)222-1222
Environmental Health and Safety .......... 898-5126

* Minimum evacuation distance from buildings or affected areas is 100 feet upwind.
Violence in the workplace can originate from a variety of sources. There may or may not be warning signs. Violence may originate from a current or former disgruntled employee or student. The person may be an angry spouse or relative of an employee or student. It also may be someone without any relationship to the victim. The violence may be a random act or something planned to gain public attention. All members of the campus community are encouraged to assist in maintaining a safe workplace by remaining alert to suspicious persons or situations.

The following guidelines and information is intended to provide information for all employees to use as methods of prevention and intervention of workplace violence.

### 8.1 Emergency Procedures

**Immediate Threat:**
- Call 911 from any campus phone or 898-5555 (UPD).
- Get out of the area and away from the immediate threat.

**Violence Committed:**
- Call 911 from any campus phone, blue light phone, or call 898-5555 (UPD) immediately if a person commits an act of violence against you or another person.

**Intimidating Situation/Threat of Violence:**
- Call 911 or 898-5555 (UPD) if a person has communicated a direct or indirect threat of physical or mental harm against you in any form (i.e. oral or written, gestures, expressions).

**Non-Emergency Procedures:**
- If you are not in immediate physical danger, but you have information or concerns related to potential workplace violence, contact your supervisor.

### 8.2 Campus Blue Light Phones

May also be used to report incidents of violence, as well as, any other emergency. The Blue Light phones directly contact University Police Dispatch and will provide your location to UPD.

Additional Information: The University has a Policy on Campus Behavior and Violence Prevention, Executive Memorandum 12-025: [http://www.csuchico.edu/prs/EMs/2012/12-025.shtml](http://www.csuchico.edu/prs/EMs/2012/12-025.shtml).

You may also contact the Human Resources Service Center at (530) 898-6771. The Human Resources Service Center is located in Kendall Hall, Room 220.
Examples of utility failures may include electrical outages, plumbing failure/flooding, natural gas leaks, steam line breaks, ventilation problems, and/or elevator failures.

In the event of a failure, immediately notify FMS at 898-6222. For emergencies or after hours, call UPD at 898-5555 or 911 from a campus phone.

**Note:** Calling 911 on any campus phone will put you in contact with UPD. You may also call UPD at 898-5555. Calling 911 on your cell phone will likely reach Chico Police and Fire Department or the California Highway Patrol. Be sure to give your exact location on campus to the dispatcher.

If there is potential danger to you or other occupants:

- Call University Police at 911 from any campus phone or (530) 898-5555 from a cell phone. **Note:** Telephones may not be functional even under generator power.

- In a situation where a building is required to be evacuated, please proceed to the building-specific Emergency Assembly Point* and wait for further instruction from a Floor Evacuation Coordinator, identified by an orange vest or if provided by other officials.

- If safe to do so prior to leaving, turn off all equipment, machines, and computers.

- Assist disabled persons to the best of your ability.

- Do not attempt to use elevators.

- If the building has evacuated, remain at the Emergency Assembly Point until the Fire Department or designated representative has given the “all clear” to re-enter the building.

**Note:** Contact your supervisor to determine if there are specific evacuation procedures for your department.

* The Campus Emergency Assembly Point map can be found at the end of this document.
State law requires all building occupants to promptly evacuate when the fire alarm sounds or when ordered to do so by emergency response personnel.

Almost all campus buildings have designated Floor Evacuation Coordinators (FEC) who can be identified by their orange or lime green safety vests. These employees have received specialized training and will, to the best of their ability, provide assistance to others during a building evacuation. If you have information regarding the cause of the evacuation or know of any significant hazards, advise any building FEC as soon as possible so they can relay the information to First Responders.

10.1 Building Evacuation Information and Procedures

- In addition to the building fire alarm, other means of notification to evacuate (Chico State Alerts, campus telephone system, radio, verbal, etc.) may be utilized as determined necessary by authorities.

- Know the nearest exit(s) from your work area and the route(s) you will follow. In advance, establish an alternate exit route in the event your primary route is blocked or unsafe to use.

- Assist those needing assistance ONLY if you are able to do so without jeopardizing your own safety. Notify the Floor Evacuation Coordinators of any people who are unable to evacuate without assistance or if you believe other people may still be in the building.

- In case of fire do not use the elevator.

- Once outside, proceed to the building’s designated Emergency Assembly Points (EAP) or similar area at least 100-feet from the building. Please refer to the EAP/campus map page at the end of this document for reference.

- Emergency Assembly Points are considered flexible and may need to be adjusted depending on wind direction or the magnitude of the hazard.

- Remain at the Emergency Assembly Point so you can be accounted for. If you must leave, please let your supervisor or co-workers know that you are leaving.

- Assist the Floor Evacuation Coordinators for your building in attempting to account for all persons.

- Do not re-enter the building until you receive the “all clear” from emergency personnel or other official designee.

10.2 Campus Evacuation

- If an emergency situation requires a section of or the entire campus to be evacuated, the campus community will be advised of appropriate evacuation routes and/or locations to assemble by University Police, Fire Department personnel, or other officials as warranted by the situation. If there are no external hazards or dangers, no specific directions other than to evacuate will be provided.
11.0 SHELTER-IN-PLACE PROCEDURES

This section describes specific actions that should be taken to mitigate dangers created by environmental hazards such as severe weather. Severe weather includes high wind events, thunderstorms, hail storms and tornados. A Shelter in Place order may also be issued in the event of a chemical spill, biological hazard or other environmental hazard that poses a physical threat to campus or has potential to affect campus.

Shelter in Place is also warranted when any portion of or all of campus is threatened by hostile and/or armed intruder(s). Shelter in Place may be ordered when a threat is in the vicinity of campus, is near or moving towards a specific building, near or moving towards several buildings, or is occurring inside of a building.

Severe Weather / Environmental Hazard Actions:

• If outside, go inside the nearest building. Note: Residence Halls are locked 24/7, only students and authorized staff have card access.

• If instructed to do so, move to an interior room with no windows or small windows.

• If instructed to do so, turn off air conditioning and/or heating systems under your control.

• Close and secure all doors and windows to prevent inadvertent opening (gust of wind, etc.).

• Remain calm, locate flashlights and other emergency supplies.

Armed Assailant / Threat of Violence Actions:

• If outside, take cover immediately. If safe to do so, go into the nearest building. Note: Residence Halls are locked 24/7, only students and authorized staff have card access.

• If possible, secure exterior building doors, lock or barricade doors and windows.

• Classrooms: Lock and/or barricade the door(s). Turn off lights, crouch down out of sight of doors and windows. Conceal yourself as much as possible.

• Offices: Lock and/or barricade door(s). Turn off lights, move away from doors and windows. Conceal yourself as much as possible.

• Remain calm and be quiet. Turn cell phones to vibrate.

• If you have just arrived at campus, stay in your vehicle and consider leaving campus or driving to a safer location.

• Do not open doors, windows or come out until you are notified by campus officials of an “all-clear”.

To help ensure your safety, please follow the instructions of campus officials. During all emergency situations, please stay alert for updates from the University Emergency Notification System, Chico State Alerts. Make sure your contact information is current. Please go to CHICO STATE ALERTS to verify and update your information.
12.0 ASSISTING PERSONS WITH SPECIAL NEEDS

During emergency evacuations, individuals with mobility or sensory impairments (hearing or vision) may need assistance or guidance in evacuating the building. Do not attempt to use elevators if there is a fire or other situation that could affect electricity/power.

- If the person will not be able to evacuate, even with assistance, call 911 from a building phone immediately. Fire alarms and large numbers of people moving as they evacuate may disorient a person, even when normally familiar with the area.

12.1 Assisting Visually Impaired Persons

- Guide the person by allowing them to take your arm below the elbow and instruct him/her to come with you. Stay calm, move slowly and communicate clearly with the individual. Also, evacuate service animal with the person – do not attempt to control or give directions to the service animal.
- Advise the individual, well in advance, of any hazards or obstacles in their path.
- When you have reached safety, advise the individual of his/her location and stay with him/her if necessary. Before leaving, make sure the individual does not need any further help.

12.2 Assisting Hearing Impaired Persons

- To get a person’s attention, you can flash room lights on and off, wave your arms, or tap on the person’s shoulder.
- Gesture about what is happening and what to do (i.e. follow me, get down.)
- Write on a board or paper the nature of the emergency or the evacuation route.

12.3 Assisting Mobility-Impaired Persons

- First ask the individual if he/she has medical/health needs, advice, or requirements.
- Individuals using wheelchairs can be pushed or accompanied to safety. Do not use elevators. If needed, seek help to safely assist the person. Look for Floor Evacuation Coordinator identified by orange or lime colored safety vests.
- If located in a multi-floor building, locate the nearest enclosed stairwell or pre-designated shelter-in-place area. Direct or escort the individual to await assistance or rescue within the stairwell or designated shelter-in-place location, call 911 to notify of your location and the nature of the need for assistance or rescue. Evacuate the building, do not put yourself in extra danger.
- Individuals using canes, crutches, or walkers should evacuate themselves except in the event that rapid evacuation is deemed essential.
- If in need of assistance, call 911 or 898-5555 (UPD). Do not attempt to transfer a person from a wheelchair unless absolutely necessary and you have their permission to do so.
12.4 If You Are a Person with Special Needs

It is critical that you have a plan prior to an emergency, and that the plan is appropriate for your needs and the building. Most campus buildings (over one story) have protective stairwell enclosures, buildings that do not have enclosed stairwells have pre-designated rooms or areas that can be used as a safe area in which to take shelter while awaiting assistance or rescue.

Floor Evacuation Coordinators, University Police, and Chico Fire personnel are aware of these locations should assistance or rescue be required. Your plan should include the appropriate location(s) to go within each building you work in or frequent.

The following general guidelines will help you begin to form your plan:

- Become familiar with the locations of all exits, stairway access, areas to take shelter, await assistance or rescue, building “red” emergency phones, other accessible phones, and elevators.

- If unable to speak or speak loudly, carry a whistle or have other means of attracting attention of others in the case of an emergency.

The Accessibility Resource Center (ARC) is available to provide guidance to persons with special needs:

The ARC will provide you with a guide that lists of campus buildings and the areas in which you can shelter in place while waiting assistance. This guide lists all buildings on campus that are over one story in height.

Please call (530) 898-5959 or go to the ARC website at http://www.csuchico.edu/arc/

- All members of the campus community including; faculty, staff, and students are strongly encouraged to review the “Evacuation Procedures for People with Mobility Impairments” which can be found on the Emergency Preparedness web page.

- Please contact the Campus Emergency Preparedness Coordinator at (530) 898-5126 if you need assistance in developing an emergency response plan for each building you work in or may frequent.

- Be aware of the Emergency Assembly Point Locations for all buildings you frequent. Following is a link to the EAP locations on Campus and at the University Farm: Emergency Assembly Point Locations.
