

Commonly Used Waste Labels

PCB Ballast Drum – Label 1

PCB Ballast Drum – Label 2

Universal Waste – Lamps

Universal Waste – E-Waste

Non-PCB Ballast Drum

Hazardous Waste Label for Asbestos

Cal-OSHA Label for Asbestos

Hazardous Waste Label for Lead Paint Chips & Debris

Treated Wood Waste

Contractors working on University property must comply with all of the requirements found in California's Title 22. To aid in proper management of hazardous wastes and / or universal wastes being generated on University property, sample labels can be found at www.csuchico.edu/ehs. These labels cover many, but not all, of the hazardous or universal wastes encountered and handled by contractors. This list is only offered as a job aid and is by no means comprehensive.

Contractors: **Do not** set up a temporary EPA ID number for projects conducted on University property. All hazardous wastes generated on university property need to be labeled and shipped using the University's EPA ID number. Note: the University uses three different EPA ID numbers (one each for campus, farm, and University Village) and they each have different addresses. Hazardous and Universal wastes need to be contained and labeled completely as soon as the first bit of waste is created. Accumulation Start Dates must be added to waste labels as well. Be sure to coordinate shipping of hazardous wastes and universal wastes with the Campus' Environmental Health and Safety Department (EHS). **Only EHS personnel are authorized to sign hazardous waste shipping manifests.** The EHS department can be reached at (530)898-5126.

Spills: If a spill or release of a material has the potential of contaminating air, water, or soil, the contractor must report the spill to the Project Manager. In an Emergency, contact University Police Dept. (call 911) first and then notify the Project Manager.
