

Storm Water Pollution Prevention: Illicit Discharge

What is an illicit discharge?

An illicit discharge is any discharge into the storm drain system that is not purely rain water. This could be from a sewer overflow, improper disposal or spill of oil or chemicals, and car wash wastewater.

Who do you notify if you spot one?

If you think you spot an illicit discharge on campus please contact Environmental Health and Safety at 898-5126 (during working hours) or University Police at 898-5555 (after working hours).
