

Before & Beyond: The 50th Anniversary of the Moon Landing

Gateway Science Museum presents a temporary exhibition that celebrates the human and technological achievements needed to reach the moon, and envisions a future Mars landing. Visitors to this interactive multimedia experience enter the gallery and are immediately transported to a rich visual and audial landscape evocative of space itself. A 1969-era living room broadcasts vintage footage of July 20 moon landing, welcoming visitors to relax and watch this monumental moment in human history. The Moon Café is a theater for film, audio, and live performances and discussions, and hands-on, minds-on activities abound. **EXHIBIT OPENS JUNE 1, 2019.**

An estimated 10,000 visitors, including 4,500 school children will visit *Before & Beyond*. Your support with any one of these three sponsorship opportunities will help us fund this new exhibit.
