INFORMATION RESOURCES

Vision
The Information and Technology Strategic Plan establishes the following vision for information technology: CSU, Chico will be recognized as an innovative and dynamic campus that integrates technology into the fabric of the institution by providing students, faculty, and staff with the information, tools, and services needed to accomplish the University’s mission.

Goals
a. Advance the learning and teaching environment
b. Enhance campus connectivity and infrastructure
c. Provide effective administrative solutions
d. Leverage information and knowledge management
e. Improve information and technology services

Areas of Distinction
The management team of Information Resources facilitated an analysis of our organizational strengths, weaknesses, opportunities and threats – the SWOT analysis. This process highlighted a number of key areas of distinction:

a. Technical leadership expertise that works well within a federated environment
b. Management using a continuous improvement process supporting a reliable infrastructure to meet campus goals and objectives
c. Support of business process improvement initiatives, training, and development opportunities

Priorities
• Learning, engagement and student success
• Innovation, creativity and nimbleness
• Fiscal accountability, effective communication and resilient systems
• Data driven decisions, participative governance, transparency, and respect for diverse opinions
• Staff teamwork, inclusion and learning
