

Kunal Bhavsar

Home Country: India

Major: Master's in Business Administration, Option – Enterprise Information Systems

Graduation Date: May 2019

Dream Job: SAP Consultant or Business Analyst

With a background in Electrical Engineering, already having founded his own company in 2014, and soon to graduate with his MBA and begin another company with one of his professors, Kunal Bhavsar is on the fast track to success.

Before he makes any big decision, Kunal researches all of his options. In doing so, he discovered that Chico State is one of only six global SAP University Competence Centers. Given the attractiveness of the program, the safety and affordability of Chico, and the proximity to the Silicon Valley, he knew Chico was the right place for him.

Kunal's impressive academic achievements, along with his co-curricular and community engagement activities, earned him an invitation to be the only student participant at a California state collaboration with state senators and industry leaders to develop building and maintaining a modern, financially sustainable, secure, resilient energy and transportation infrastructure that aligns with United Nations Sustainable Development Goals. This experience was one of the highlights of Kunal's time at Chico State.

This young man, with his amazing work ethic and bright, friendly smile, is destined for great things. We are proud to have him as a future Wildcat alumnus!
