The Master of Science in Mathematics Education is a 30-unit summer start program that provides a unique opportunity for those interested in advancing their professional development.

- Are you a current math teacher wanting to advance your professional skills?
- Do you desire to deepen and broaden your understanding of mathematics and mathematics education?
- Do you want to develop your understanding of math education research and its relationship to practice?
- Are you interested in upgrading your skills as a teacher and leader?

If this sounds like you, we invite you to consider the master’s in Math Education.

What’s It Like to Be a Math Education Master’s Student?

- Work closely with dedicated faculty.
- Benefit from strong cohort support.
- Take summer and online courses to fit a teacher’s schedule.
- Design and implement research projects in your own classroom.
- Work toward qualification to teach at the community college level.
- University housing available during summer sessions.

Eligibility:
A bachelor’s in mathematics or state certification to teach secondary mathematics.

How to Apply:
Application details and a list of additional requirements can be found on the program website.

“With a masters in Math Ed paired with my bachelors in mathematics, I’ll be eligible to teach dual-enrolled college courses at my worksite and courses at our local community colleges. I also want to have the background to be qualified for a job with the Department of Education to help strengthen mathematics in our community.”

Elena Tomasetti, Cohort 1
MS in Mathematics Education
