

Hi Students,

According to my records, many of you have not yet established your PreCheck account for your Clinical Requirements documentation. Thank you to those of you who have started this important process. If you have not set up your account, please do so ASAP.

I have attached the instructions. Do not initiate or pay for the Drug Test or Background Check portions yet. We also do not want you to add anything that will expire prior to mid-August. By waiting until later in the semester to do these things, we hope we will prevent you from having to submit anything more than once.

Once you have set up your PreCheck account, use the Student Guidelines Handbook that is available to Enrolled Students on the RN-BSN webpage to answer questions you may have about the immunization requirements. Note that the Table of Contents is linked to the content for quick access.

You will not be allowed to begin your clinical until all clinical requirements documentation has been validated.

Thank you for your attention to this important matter.
