Supersedes:	
Revision:	EM 06-084
Enabling Legislation or Executive Order:	

Policy on Information Technology Governance, Revision of EM 06-084

Preamble

The purpose of this policy is to establish the University's governance structure for major decisions relating to Information Technology. This multilayered governance structure is designed to actively engage representatives from all areas of the campus community in planning and implementing information technology that supports the goals of the University. The structure also provides a process for presenting high level strategic proposals to the President, who shall then make the final decisions.

Definitions

Information Technology (IT) deals with the use of all forms of computer-related equipment and software to collect, store, process, transmit, retrieve, and secure information as well as the related aspects of managing and distributing information in support of the educational and service mission of the University.
