<p>Note: Includes special electrical per design for Quad power feed &amp; (4) integral 800 Amp circuit breakers Electric Hot Water Boiler rated at 1,920 KW /6,551 MBH when operated on 480/3/60 power Pressure vessel built to 150 psi, 250°F design standard and complies with ASME Code Section IV, "H" Code and is National Board Registered. • Pressure vessel is wrapped with 4" thick blanket of fiberglass insulation. • Boiler vessel enclosure is 16-Gauge painted steel jacket mounted on a full-size, flanged steel base. • Electronic control panel is built into the NEMA-4 compliant enclosure, accessible via key-locked door(s). • Built for compliance with UL Subject 834 and NEC/NFPA Article 424-G, ASME &amp; CSD-1. • Incoloy sheathed, U-Shaped heating elements rated to 75 watts-per-square-inch and individually mounted in 2-1/2 inch-square flanges for easy removal and replacement. • Main supply circuit lugs with integral branch circuit fusing. • Magnetic contactors rated @ 500,000 cycles; 120 volt fused control transformer • Automatic electronic temp. control: Model has 16 steps with Proportional Progressive Sequence Step Control • Full port drain valve; ASME safety relief valve; Pressure gauge w/cock; automatic air vent. • Low Water Cut-Off Switch: Probe type with manual reset, test &amp; pilot light to meet CSD-1 requirements &amp; secondary LWCO per CA. Code. • High Temperature Limit Switches: equipped with two temperature limit switches, 1 auto reset &amp; 1 with manual • Temperature Gauge: dial type temperature gauge plus a digital electronic temperature readout on the temperature controller interface. • KW Limiting Switches: On/Off toggle switch for each step. In the off position, the toggle switch cuts power to its assigned step, disabling that step, thereby limiting the maximum KW output from the boiler. • Water inlet/outlet connections; • On/Off power switch with pilot light; One status pilot light for each step; volt meter. • Flow Switch: Installed on inlet side of boiler to prevent boiler heating when there is little or no water flow into the boiler. In a low flow or no flow condition the temperature controller may detect a drop in boiler temperature and signal a call for heat, despite no inlet water flow into the boiler. The flow switch signal cuts power to the step controller, preventing the boiler from heating. • On-Board Alarm System: Audible alarm buzzer with silencing switch, plus an additional common alarm light that signals any or all of the following abnormal boiler conditions: (1) excessive tank temperature, (2) zero flow or low flow into the boiler tank, and/or (3) low water condition in the tank. • BMS Control – Siemens S7 System with touchscreen that allows BMS interface with On-Board controller allowing BMS to adjust boiler temperature set-point (requires a proportional signal from BMS)</p>
