APSS Guide to Searching for Specialty Classes in Class Schedule

In 2020, a new Class Schedule was implemented. This new Class Schedule has live data and better search capabilities. The new search capabilities include the ability to search for classes by class attributes. Class attributes are used for several purposes including designating GE and specialty classes.

Not all class attributes will be available in the filter, as some are for internal use, but the following are included: Chico Distance & Online Education (CDOE), First-Year Experience (FYE), GE, Global Cultures, Graduation Writing Assessment (GWAR), Service Learning, Sustainable Course, U-Course/Course Link, U.S. Diversity, Writing Course, Zero Cost Course Material (ZCCM).

To help make these easier to use, we have changed the layout of the Class Schedule, moving the Class Attribute and Class Attribute Value boxes out of filters and up into the search criteria area.

Note: The Class Schedule is responsive and therefore the screenshots below may not always match your or the students view.

1. Use the Class Attribute drop down box to pick the type of specialty class you are searching for.

Tip: to select multiple Class Attributes, click on the + to the right of Class Attribute Value. You can search on up to three attributes.
2. You can then search on just that criteria or further narrow it by picking a value from the Class Attribute Value drop down box.
