

Welcome to the Supervision Toolbox! In this tutorial, we'll explore the organization and tools available to support supervisors and candidates along their educational journey. Let's get started!

Upon opening the Supervision Toolbox, you'll notice it's organized into several main sections: Observation Tools, Coaching and Mentoring Tools, and Program Specific Tools. Each section is designed to provide resources and support for different aspects of supervision and evaluation. You can expand or collapse each subsection using the [+] and [-] buttons for easy access to specific tools. Let's explore each section!

Under the Observation Tools section, you'll find resources such as evaluation rubrics and data collection tools, candidate reflection forms, and resources for conducting video observations.

In the Coaching and Mentoring Tools section, you'll find the Program Supervisor Handbook and FAQs, samples of conference and meeting agendas, and guides for communication and coaching.

Lastly, under Program Specific Tools, you'll find tailored resources for the various credential programs (i.e., Multiple Subject, Single Subject, Education Specialist, Concurrent, and Bilingual). Each program has a handbook, supervision roadmap, clinical practice checklist, and other relevant documents to guide candidates and supervisors.

As you explore the Supervision Toolbox, remember that it is designed to streamline clinical practice processes and provide comprehensive support for both supervisors and candidates. Whether you're navigating rubrics, conducting observations, or accessing program-specific resources, the toolbox is here to help!

Thank you for watching this tutorial. Please contact your program coordinator if you have any questions or need further assistance. Happy teaching and learning!
