New Programs Need New Leaders!

We have 2 new programs in San Jose, and we want YOU to join the team!

The Welcoming Center

The Welcoming Center supports children who are entering the system, experiencing a loss of placement, or returning from elopement.

Staff provide care, answer questions, and make each child feel as comfortable as possible. Staff can also engage with the child’s biological family. Clinicians do assessments, screenings, and placement reports.

On-call nursing, psychiatry, and medical services are accessible as needed.

The Welcoming Center offers a home-like setting for 4—6 children, with toys, games, healthy snacks, entertainment media, space to play including a nearby park, and individual rooms for those who want some quiet space.

Intensive Stabilization Services (ISS)

ISS includes preventative interventions to families through phone coaching and in-person support.

ISS teams also provide in-person response for youth who are experiencing crisis in the community that may jeopardize their placement.

ISS staff can provide follow-up sessions for up to 30 days to help link families to resources and ensure stabilization.

We are hiring for team supervisors, Master’s level clinicians, and BA level counselors.
