3 Project Milestones and Timeline

3.1 Phase 0: Planning, System Configuration, and Support Staff Training

3.2 Phase 1: Limited Number of Faculty Teaching in Canvas

3.3 Phase 2: Expanded Group of Faculty Teaching in Canvas

3.4 Phase 3: All Faculty and Students in Canvas

3.5 Phase 4: Decommission Planning and Completion of Exceptions

3.6 Phase 5: Decommission of Bb Learn and other applications no longer used

4 Risks/Concerns/Assumptions

4.1 The transition will be tough on students

4.2 SIS data integration is time consuming, complex, and technical resources are in short supply

4.3 Utilizing API tools to configure the SIS data integration with Canvas

4.4 Ongoing Blackboard Learn 3rd party integration support

4.5 Requiring the move to one campus email before migrating to Canvas

4.6 Ensuring campus is aware of training and support resources

5 Student Information System Data Integration

6
1 Project Introduction

1.1 Problem Statement

The Governor’s 2021-2022 budget provided $2M in new ongoing funding to the CSU, contingent on all campuses moving to an “intersegmental LMS”. 16 CSUs already use Canvas, and an intersegmental LMS is tantamount to the seven remaining campuses migrating to Canvas. The Chancellor’s Office asked the 7 remaining campuses to declare their intent in November 2021; Based on the CSU, direction, Chico has committed to the migration along with six other campuses. The deadline for completing the LMS migration itself is the end of the 2023-2024 academic year; we interpret this to mean that Canvas would be the official campus LMS beginning in spring 2024 semester (ie., Bb Learn would no longer be used for course instruction after spring 2024).

1.2 Benefits/Value

Our Bb Learn system is over 10 years old and it feels clunky to students and faculty. It is believed that migrating to Canvas will provide the following benefits/value to our campus:

- Canvas provides a better user interface/experience for faculty and students
- Canvas reduces the time required for students to transfer/transition from a California Community College (i.e., they don’t need to learn a brand-new LMS)
- Canvas’ data, reporting, and integration are reportedly much better than our current system
- Canvas Outcomes can provide data for program assessments
- Canvas’ support cost-options could free-up some staff of common questions
1.3 Project Objectives

In Spring 22 Chico State is beginning to plan the migration from Blackboard Learn to Canvas. There will be three phases migrating courses to Canvas with the culmination of the decommission of Blackboard learn by June 2024. To successfully make the transition, the following objectives must be met:

- Configure development and production Canvas environments
  - Update Canvas branding to comply with university standards
- Configure SSO in both development and production instances of Canvas
- Develop and deploy a new data integration with the Student Information System
  - Terms
  - Sections
  - Courses/classes
  - Enrollments
  - Instructors
- Utilize Account Center to develop and deploy user provisioning and deprovisioning with Canvas
- Configure course shell templates
- Develop and publish training and support materials utilizing existing Chico State support structures
- Identify and deploy critical third-party application integrations
- Configure program assessment tools
- Develop a plan and process for course content migrations
- Migrate faculty course content into Canvas
- Decommission Blackboard Learn
- Archive course content per university retention guidelines

1.4 Out of Scope

Part of the funds secured by the legislature include migration of some content from Bb Learn to Canvas. Where possible, Chico State will utilize standard delivered tools and modules provide by Canvas and other approved third-party vendors.

2 Project Resources and Costs

2.1 Costs

- The CSU received $2M in new funding will cover the overlap in license costs up until the end of FY 2023-24.
- After FY 2023-24, assume an annual cost increase of $50K. Canvas is more expensive than Bb Learn, but we don’t know if we’ll be liable for the entire delta, or if the CO will use some of the ongoing $2M budget to cover it.

2.2 Resources and Stakeholders

Please include both technical (internal or external) and functional resources required. Estimated commitment:

- Minimal
- Moderate
- Substantial

• Development of training resources for faculty, including knowledge base articles, videos, business process guides, and in-person training courses for Canvas  
• Assist faculty with course content migration  
• Development and delivery of training for Wildcat Computing Services student staff  
• Monitor support issues and provide feedback to the Learning Technologies and Canvas support teams  
• Collaborate with and develop student centered training and support resources | Substantial |
| Daniel Cavanaugh, Chancellor’s Office | Chancellor’s Office | • Development of a standardized data feed from PeopleSoft to Canvas utilizing Dell Boomi | Substantial |
| Chiara Ferrari | Faculty development | • Collaborate with TLP on faculty training, support, and communication  
• Provides feedback on Canvas configuration and course shells templates | Minimal |
| Scott Kodai, Director, IT Support Services | Front-line support Liaison | • Liaison between the project team and IT Support Services front line support | Minimal |
| Wendy Bentley, IT | Communications/Change management | • Develop communications plans  
• Create communications content  
• Regular assessment of campus readiness to help inform continued communication and training | Substantial |
| Jeremy Olguin | Accessibility | • Accessibility review and support | Minimal |

3 Project Milestones and Timeline

3.1 Phase O: Planning, System Configuration, and Support Staff Training

Link to the Asana project plan developed by Instructure (vendor for Canvas)  
https://app.asana.com/0/1201845828976679/overview

Below are the milestones required for the implementation and roll out of campus.
### Campus strategic planning session with implementation teams
- **Date:** 02/04/22  
- **Status:** Done

### Project kick-off with Canvas
- **Date:** 03/04/22  
- **Status:** Done

### Canvas beta and prod environments provisioned
- **Date:** 03/09/22  
- **Status:** Done

### Identify Bb Learn processes and project requests that can be deferred or cancelled
- **Date:** 03/15/22  
- **Status:** Done

### Phase timelines approved
- **Date:** 03/25/22  
- **Status:** Done

### Communication plans developed
- **Date:** 03/25/22  
- **Status:** Done

### Inventory third party integrations along with priority order for implementation
- **Date:** 03/25/22  
- **Status:** Done

### ITPR completed
- **Date:** 04/08/22  
- **Status:** Done

### Phase 1 limited faculty call for participants
- **Date:** 04/15/22  
- **Status:** Done

### Branding elements configured in Canvas production instance
- **Date:** 04/22/22  
- **Status:** Done

### Course content migration guidelines developed and approved
- **Date:** 04/22/22  
- **Status:** In Process

### Vanity URL and SSL certifications completed and development instance
- **Date:** 04/29/22  
- **Status:** Done

### Technical training completed for campus Canvas support staff
- **Date:** 04/29/22  
- **Status:** Done

### Phase 1 limited faculty participant selection
- **Date:** 05/02/22  
- **Status:** Done

### Canvas Day in May
- **Date:** 05/11/22  
- **Status:** Done

### Canvas custom course templates created
- **Date:** 05/16/22  
- **Status:** In Process

### Authentication configured
- **Date:** 05/16/22  
- **Status:** Done

### Canvas blueprint created
- **Date:** 06/02/22  
- **Status:** In Process

### Course content migration tested and timeline developed
- **Date:** 06/02/22  
- **Status:** In Process

### Firewall exceptions configured
- **Date:** 07/13/22  
- **Status:** In Process

### Canvas user provisioning configured in Account Center
- **Date:** 07/14/22  
- **Status:** In Process

### Phase 1, third party integrations (LTI) completed
- **Date:** 07/15/22  
- **Status:** In Process

### Roles and permissions configured to support faculty in fall 22 cohort
- **Date:** 08/01/22  
- **Status:** Not Started

### Training resources developed and published to limited faculty
- **Date:** 08/01/22  
- **Status:** In Process

### Limited faculty group provisioned access to Fall 22 courses
- **Date:** 08/01/22  
- **Status:** Not Started

### SIS initial data integration completed
- **Date:** 08/01/22  
- **Status:** In Process

### Canvas procedures and guidelines developed
- **Date:** 08/01/22  
- **Status:** In Process

### Canvas Assessment structure analysis
- **Date:** 08/01/22  
- **Status:** In Process

### Terms, sections, courses, enrollments, instructors, loaded for Fall 22
- **Date:** 08/01/22  
- **Status:** Not Started

### Course shell access for limited faculty in Canvas
- **Date:** 08/1/22  
- **Status:** Not started

### Limited faculty group training completed
- **Date:** 08/15/22  
- **Status:** Not Started

### Course content migrated for limited faculty group completed
- **Date:** 08/15/22  
- **Status:** Not Started

### User Acceptance Testing completed
- **Date:** 08/15/22  
- **Status:** Not Started

### Phase O Completed
- **Date:** 08/15/22  
- **Status:** Not Started

### 3.2 Phase 1: Limited Number of Faculty Teaching in Canvas

</tbody>
</table>

4 Risks/Concerns/Assumptions

4.1 The transition will be tough on students

Over the next 18 months, many students will have courses hosted in both Learning Management Systems. This will increase the learning curve for students. Once the migration is complete, it is anticipated that Canvas will provide an improved student experience.

4.2 SIS data integration is time consuming, complex, and technical resources are in short supply

A new data integration will need to be developed between our SIS system (PeopleSoft) and Canvas. Unfortunately, resources on our campus and at the Chancellor’s Office are in short supply. Ultimately, the campus would like to have the Chancellor’s office develop an integration that can be used by the 7 CSU campuses but our timeline may necessitate the development of an interim solution. In either case, resource availability is very likely to impact the University’s desired timeline.

Furthermore, the integration with our SIS system is complex and will require input from key data owners to ensure the data feed is pulling the right information into Canvas. Resource constraints will likely impact the data validation required to complete the data integration.

4.2.1 Risk mitigation options/strategies

- Work with the Chancellor’s office to get commitment to develop a CSU wide solution
- Work with the Chancellor’s office to raise the priority level of the development work for a systemwide solution.
- Work with Chico State campus stakeholders to shift projects to free up resources to develop an onsite solution.

4.3 Utilizing API tools to configure the SIS data integration with Canvas

Most Canvas customers use other data transfer methods. Additional time will be required to work through the API integration between Dell Boomi and Canvas.
4.4  Ongoing Blackboard Learn 3rd party integration support

There are several 3rd party integrations in Blackboard Learn that are on versions that are no longer supported by the vendor. Instead of spending valuable resource time to update the Blackboard Learn integrations, the team will defer some maintenance updates and focus valuable resource time migrating over to Canvas.

Foregoing the maintenance could pose a potential risk to the timeline of the Canvas migration if resources need to be pulled away to fix an issue on the legacy system if the service become inoperable.

4.5  Requiring the move to one campus email before migrating to Canvas

Chico State utilizes two email systems; O365 for employees and gmail for students. Some systems use email as the primary key and when a user has dual roles, logic has to be developed to determine the right email type to use, system by system. Moving to one email would reduce the amount of technical overhead to support systems down the road but the process to get there will be very time consuming and will cause additional confusion for campus stakeholders during the transition.

Canvas only allows one email in the system. It is the current belief that the MS email account would be populated in Canvas for students instead of the gmail email account. During the multi-phased transition from Bb Learn to Canvas, this would mean that students would have gmail as their email account in Bb Learn and the MS email account in Canvas.

Changing both the campus email and transitioning to a new Learning Management System introduces a significant amount of change for students, faculty, and staff. Issues surrounding the email migration could adversely impact attitudes about the Canvas migration, hurting adoption efforts.

4.5.1  Risk mitigation options/strategies

- Utilize the same email type used in Bb Learn until the transition to Canvas is complete to reduce confusion for students, faculty, and staff.
- Plan to convert the email type as a follow-up project after Canvas goes live.
- Put in significant outreach efforts to ensure students, faculty, and staff know how to forward their gmail messages to their MS email account if the campus intends to do the migration in parallel with the LMS migration.

4.6  Ensuring campus is aware of training and support resources

Special care will need to be taken to ensure that faculty and staff are aware of where to find new LMS resources.

4.6.1  Risk mitigation options/strategies

- Develop communications to promote the new resources
- Periodic surveys to determine if there are any knowledge gaps
5  Student Information System Data Integration

5.1  Current data diagram

Work is currently in progress with the Chancellor’s Office and several other CSUs to develop a streamlined data integration between PeopleSoft and Canvas. The goal of this collaborative effort is to produce an integration that can be utilized by multiple CSUs once completed.

5.2  Future state data diagram
6  User provisioning

User provisioning is managed by the Identity and Access Management system, Account Center and our campus plans to continue to use Account Center to provision users in Canvas.

7  Third-party application Integration List

The Learning Management team is developing a list of strategic third-party applications that are commonly used by campus stakeholders. The list will include the priority order in which the third-party applications will be configured with Canvas.

### 8 Communication Plan

#### 8.1 Communication Calendar and Target Audiences

The communication calendar will continue to evolve as Canvas is rolled out to campus.  
https://docs.google.com/spreadsheets/d/1Q8t3XAz_syvDMbKruZ6sZsNmjiAFnQuNpfjUQdLwi0/edit?usp=sharing
9 Training Plans

9.1 Faculty Training
9.2 Fall 22 Faculty Training
9.3 Student
9.4 Staff

10 Engagement Plan

11 Documents/Assets
